DETAILED ACTION

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the exhaust port having a housing must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Application/Control Number: 10/672,014 Page 3

Art Unit: 2841

Claim Objections

2. Claims 21-28 are objected to because of the following informalities:

Regarding claim 21, applicant should clarify the specific structure intended by "the exhaust port having a housing." The structure and arrangement of the "exhaust port" and the "outlet from which cooling air is sent from the housing" is unclear. It is not clear whether applicant merely intends the "outlet" to be the air output from the fan. Appropriate correction is required.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 21-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al. [US 6,263,957] in view of Lu [US 6,137,681].

Regarding claims 21 and 25-26, Chen et al. disclose an electronic apparatus (figures 1a, 1b and 3) comprising:

- a heat generating component (310);
- a heat receiving portion (330) thermally connected to the heat generating component (figure 3);

Application/Control Number: 10/672,014

Art Unit: 2841

- a cooling unit (figure 3) including a plurality of fins (322) for radiating the heat of the heat generating component and a fan (340) for supplying cooling air to the fins; and

a circulation path (320) circulating a cooling medium between the heat receiving portion and the cooling unit for transmitting the heat of the heat generating component which is transmitted to the heat receiving portion, to the cooling unit through the cooling medium, wherein the circulation path includes first and second path portions being separated from each other throughout a distance between the heat receiving portion and the cooling unit (figure 3).

Chen et al. disclose everything claimed except the fan directing the air towards an exhaust port within a housing.

Lu disclose a cooling system [10] having a fan [11] channeling air through a fan output through a cooling means into an exhaust port within a housing [figure 1].

It would have been obvious to one of ordinary skill in the art at the time the invention was made to channel the cooling air of Chen et al. through an exhaust port within the housing, as suggested by Lu, in order to improve the cooling of the cooling medium.

Regarding claims 22-23, Chen et al. further disclose the specific structure of the cooling unit (figure 1a) with a plurality of fins (196) mounted thereon, wherein the cooling unit includes a main body (180) which includes a path (160, figure 1b) for allowing the cooling medium to flow therethrough.

Regarding claims 24 and 28, Chen et al. further disclose the electronic apparatus including a pump (317) for circulating the cooling medium between the heat receiving portion and the cooling unit through the circulation path (figure 3).

Regarding claim 27, Chen et al. further disclose the fins extending in a flow direction of the cooling air, and the path for allowing the cooling medium to flow therethrough extending in a direction that intersects the flow direction of the cooling air (figure 3).

Response to Arguments

5. Applicant's arguments with respect to claims 21-28 have been considered but are most in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Application/Control Number: 10/672,014

Art Unit: 2841

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of

the advisory action. In no event, however, will the statutory period for reply expire later

than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Hung S. Bui whose telephone number is (571) 272-

2102. The examiner can normally be reached on Monday-Friday 8:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Kamand Cuneo can be reached on (571) 272-1957. The fax phone number

for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free).
